The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

3. Claims 1, 3, 6, 10 and 26-28 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

The Applicant recites, "wherein the average degree of each terminal block." There is no antecedent basis for "average degree," which should be followed by --of polymerization.--

5. In Claim 3, there is not bond connectivity between "YBX."

Please show how the components of formula I is connected.

6. In claim 5 and 10, the Applicants recite parenthetical language that includes species of aryl, amine, phosphino. The language can be interpreted as use of exemplary or preferential language, which is indefinite.

7. In Claims 26-28, how does "stimulus" differ from "stimulus responsive?"

8. Claims 2, 4, 5-9, 11-25 and 43 are objected to for depending on a rejected base claim.
